

TTM4135 reference group meeting on 20-02-2026

Attendees: Tjerand, Emil, Adelin, Mina, and Gianluca

Topics that we discussed:

Lectures:

- No remarks; everything is going well. The last lecture is Thursday next week.

Exercises lectures / sheets:

- Organise an exercise class / open lab next year instead of the exercise lectures.

Practical:

- Make a post at the forum asking which tools people used and how that worked out, so that we better know what to recommend and to avoid next year.

Quizzes:

- Works well, not very difficult, but good way to recap the content of the lectures.

Lab:

- The announcement about the groups, schedule, timeline, etc. were useful.
- There is a change of lab room this year since Sahara is under construction.
- Some students will go on excursion the week before Easter, but it should be okay to complete the lab assignment during the first two weeks if needed.

Exam:

- We will find a date 2-3 weeks before the exam to summarize the course and go through some problems from earlier exams and the exercise sheets.
- We will make a few more problems on PQC since this is a new topic this year.
